

Seamless Carbon Steel Boiler Tubes For High Pressure Service

Our Product Introduction

for more products please visit us on pipe-seamless.com

Basic Information

- Place of Origin: hebei, china
- Brand Name: BaoYang
- Certification: CE & ISO
- Model Number: Seamless Steel Pipe
- Minimum Order Quantity: 1
- Price: Negotiable
- Packaging Details: Wooden packing
- Delivery Time: 7~15 working days
- Payment Terms: L/C, D/P, T/T

Product Specification

- Material: Carbon Steel Alloy Steel
- Processing Service: Bending, Punching, Cutting
- Process: Hot Rolled Cold Rolled Cold Drawn
- Wall Thickness: 1-20mm (0.04 Inch - 0.78 Inch)
- Name: Seamless Steel Pipe
- Technology: Hot Rolled Cold Rolled
- Ends: Beveled Thread+Couplings
- Length: 6M 12M OR According To Customer Requirements
- Highlight: **Seamless Carbon Steel Boiler Tubes, Boiler seamless carbon steel pipe, High Pressure seamless carbon steel pipe**

Product Description

Product Description:

The seamless steel pipes are manufactured using different processes such as hot rolled, cold rolled, and cold drawn. The hot rolled process involves heating the steel above its recrystallization temperature and then rolling it into the desired shape. The cold rolled process involves passing the steel through a series of rollers at room temperature to produce the required shape. The cold drawn process involves pulling the steel through a die to achieve the desired dimensions.

We offer our seamless steel pipes with different end finishes including beveled, threaded, and coupled ends. These pipes are available in various sizes and thicknesses to meet the specific requirements of different applications.

Our seamless steel pipes are suitable for a wide range of applications including structural steel pipes, oil and gas steel pipes, and machinery industry pipes. They are commonly used for transporting fluids and gases under high pressure and temperature conditions.

In addition to our standard products, we also provide custom processing services such as bending, punching, and cutting to meet the specific needs of our customers. Our experienced team of professionals ensures that all our products meet the highest industry standards and are delivered on time.

Features:

Product Name: Seamless Steel Pipe

Usage:

Pipeline Transport

Oil/Gas Drilling

Machinery Industry

Process:

Hot Rolled

Cold Rolled

Cold Drawn

Wall Thickness: 1-20mm (0.04 Inch - 0.78 Inch)

Standard:

API

ASTM

JIS

API 5CT

API 5L

ASTM A106-2006

ASTM A53-2

Processing Service:

Bending

Punching

Cutting

Technical Parameters:

| Technical Parameter | Description |
|---------------------|---|
| Material | Carbon Steel Alloy Steel |
| Standard | API, ASTM, JIS, API 5CT, API 5L, ASTM A106-2006, ASTM A53-2 |
| Usage | Pipeline Transport, Oil/Gas Drilling, Machinery Industry |
| Processing Service | Bending, Punching, Cutting |
| Length | 6M 12M OR According To Customer Requirements |
| Wall Thickness | 1-20mm (0.04 Inch - 0.78 Inch) |
| Technology | Hot Rolled Cold Rolled |
| Name | Seamless Steel Pipe |
| Process | Hot Rolled Cold Rolled Cold Drawn |
| Ends | Beveled Thread+Couplings |

Applications:

The seamless steel pipes are ideal for pipeline transport as they have a smooth surface and are highly resistant to pressure and corrosion. They are widely used in the oil and gas industry for the transportation of natural gas, crude oil, and other petroleum products. Carbon Steel Seamless Pipe is also used in the construction of buildings, bridges, and other structures.

The structural steel pipes are very versatile and can be used for a wide range of applications. They are known for their strength, durability, and resistance to corrosion. The pipes are available in different sizes and can be customized according to the specific requirements of the clients.

BaoYang Seamless Steel Pipe provides excellent processing services such as bending, punching, and cutting. The pipes can be processed according to the specific needs of the clients. They can also be processed through different processes such as hot-rolled, cold-rolled, and cold-drawn.

One of the main advantages of BaoYang Seamless Steel Pipe is the wall thickness. The pipes have a wall thickness of 1-20mm (0.04 Inch - 0.78 Inch). This makes them ideal for applications that require high strength and durability. The pipes are made of high-quality materials such as carbon steel and alloy steel, which make them highly resistant to corrosion and wear.

Overall, BaoYang Seamless Steel Pipe is a reliable and high-quality product that is widely used in various industries. Whether you need pipeline steel pipe, carbon steel seamless pipe, or structural steel pipes, BaoYang has a product that will meet your requirements. So, if you are looking for a high-quality seamless steel pipe, look no further than BaoYang.

Support and Services:

Our Seamless Steel Pipe product is backed by our expert technical support and services team. We provide:

Product selection guidance to ensure the best fit for your needs

Installation and maintenance support to ensure proper use and longevity

Quality control and testing services to ensure the highest level of performance

Repair and replacement services in the event of any issues

Our goal is to provide you with a seamless experience when using our Seamless Steel Pipe product. Contact us for any technical support or service needs.

Packing and Shipping:

Product Packaging:

Each seamless steel pipe will be wrapped with plastic film.

Multiple pipes will be bundled together with steel straps.

The bundle will be packed in a wooden case or pallet for extra protection.

Shipping:

The seamless steel pipes will be shipped via sea or air freight.

Delivery time may vary depending on the destination and shipping method.

Please contact us for further information regarding shipping and delivery.
